

*Cannon Hygiene's unit,
together with our Activap
germicide, guarantees
YOU the customer
complete satisfaction and
peace of mind.*

Since 1955, when Cannon Hygiene created the first disposal service for sanitary waste, we have always used the most technically advanced germicides available.

Activap, our new exclusive germicide, is no exception. Composed of entirely natural substances it has a comparable performance to other chemical products but is completely environmentally friendly in line with the company's environmental strategy.

Many of Cannon Hygiene's competitors have replicated the exchange service but have not developed a germicide that can offer the benefits of Activap.

hygiene

The Benefits of Activap

Effective against bacteria, moulds and viruses including HIV, Hepatitis B and C.

Effective throughout the total Cannon Hygiene service period - independent tests have shown that the Activap germicide can remain active for a period of up to 8 weeks.

Vapour phase ensures that even the last towel, tampon, nappy, swap etc. deposited in the unit will be rendered harmless.

Safety from cross infection - cleaners can safely handle Cannon Hygiene units.

Composed entirely of natural substances - completely environmentally friendly.

Prevents untreated waste being deposited in the disposal channels.

Exclusive to Cannon Hygiene and listed by the Food and Drug Administration (FDA) and the Council of Europe (COE).

Cannon Hygiene offer a monthly feminine hygiene service, however all services including clinical and medical can be tailored to suit your needs
