hygiene solutions for washroom - technology - linen

Do you know that there are thousands more harmful germs on a telephone, keyboard or mouse than on a toilet seat? No wonder 60% of all illness is contracted within the work place! Look after your staff and reduce absenteeism with Technology Clean Xtreme, sanitising and cleaning.

There are around 25,000 germs on a toilet seat\*. Can you

We will remove dust that builds up in vent areas and grooves of telephones, printers, fax machines and computers using brushes.

We will then stringently cleanse and remove all grime and dirt from the casing areas, keys and other components.

And finally, we will apply pre soaked sanitised anti-static wipes to the telephone or computer including around and between each individual key.

We operate quietly and efficiently within normal working hours.

\*Statistics provided by Dr. Charles Gerba, University of Arizona.

100 germs on an office telephone and just 49 on  
afford not to have Technology Clean Xtreme?

Cannon Hygiene has branches nationwide.
